Cat
Scratchers

Price: £115.99

They say: "Catrix is a modular activity centre and scratching post. The parts push and twist together, and can be swapped around. All beds, hammocks and tents button on and off, so that they can be washed, and replacement items are also available. The initial Starter Sets (there are three) can be expanded with lots of individual and interactive parts."

Buy it: From www.crystalclearpet.com or tel. 01782 520376.

Tester Elizabeth Forte of Berwick-upon-Tweed, Northumberland, has two cats. **She says:** "It looks great and is quite large so you do need a bit of space for

it. It is very easy to assemble. All three of my cats absolutely love it. They were on it straight away and were fighting for the bed on top!

"It is great value for money and it's great that you can add to it and replace parts that get worn. I will definitely be adding to it. All the cats use it differently and haven't been off it! It is very effective as I can hear the cats scratching and climbing on it. There is also always one sleeping on it. It is by far the best post I have ever had. Usually my cats have them wrecked within a few weeks, but this one still looks like new. It is definitely the Rolls-Royce of all scratch posts. A definite must for multi-cat households. My daughter-in-law was so impressed that she bought one for her cat — it really has the wow factor!" ■
